Account Shield – Product Overview

Account Shield is a unified security platform that protects user accounts from takeover attempts, identity theft,

and unauthorized access. It integrates multiple intelligence modules into one seamless system with real■time alerts

across iPhone, iPad, Mac, and email.

CORE MODULES

1. IdentityGuard

• Detects new IP, new device, new location logins

• Flags password changes and suspicious account behavior

• Analyzes login patterns and email-based security alerts

• Provides real-time threat notifications

2. BrandGuard

• Detects impersonation URLs and fake login pages

• Evaluates domain trust using heuristics and reputation scoring

• Highlights phishing attempts in emails

3. SocialGuard

• Monitors connected social media accounts

• Detects unauthorized logins or credential leaks

• Warns about account tampering and exposure risks

4. AutoGuard

• Dark web credential monitoring

• Password reuse detection

• Security recommendations and automated protections

5. Simple Mode

• Easy interface for non-technical users

• Color-coded account health status

• Automated decision-making for common risks

6. Teen Mode

• Parent-linked alerts

• Detects dangerous online activity

• Monitors unauthorized access to teen accounts

KEY FEATURES

• Instant push notifications on Apple devices

• Email alerts for high-risk events

• IP, device, and location timeline graphs

• Weekly security summary

• End-to-end encrypted data handling

• Seamless sync across Apple ecosystem

VISION

Account Shield aims to be the all-in-one personal cybersecurity assistant that quietly monitors your digital life,

alerts you instantly when something is wrong, and helps you stay safe with minimal effort.
